

Dear Patients,

As part of our efforts to keep in touch and share useful information with you, we invite you to read our monthly newsletter.

Our New Website

OBGYN Associates P.C would like to welcome and invite you to browse our newly designed website. We hope you find the information within our site beneficial and coherent.

Our website contains important information about our services, office and policies. In addition, you can learn more about each of our providers, how to contact us and receive updates. If you are a new patient, please feel free to browse the new patient information page where you can plan for your appointment ahead of time and download forms prior to your visit. Now you can also request for an appointment online by submitting an appointment request form. We encourage you to join our mailing list by submitting your email address, which is a great way to maintain contact with us and keep you updated with new information.

In addition to our website, we are launching various social media pages including Facebook, Twitter and Google Plus. Please feel free to like our page, comment or ask any questions you may have and share it with your friends.

Message From Dr. Ferber

Dr. Ferber would like to announce that from now on, he will work with all insurance companies on an out-of-network basis. He has treated both obstetrical and gynecological patients for many years. However, this has become increasingly challenging because in recent years the reimbursement rates have not risen to match costs of delivering medical care.

As you are well aware, Dr. Ferber provides intensive personal care before, during, and after pregnancy and delivery in low- and high-risk pregnancies. In addition, he conducts annual preventative exams, and gives urgent care when needed. He is committed to continue providing all patients with the best possible care.

Dr. Ferber looks forward to hearing from you, and hopes you will continue to entrust him with your care. Our office staff is always available to discuss your health benefits. If you have any questions, please do not hesitate to contact us.

Considered to be some of New York's most progressive obstetrics and gynecology doctors, our physicians' expertise includes family planning, menstrual and Pap smear irregularities, and pre- and post-menopausal symptoms. In addition, the management and surgical treatment of ovarian cysts, fibroids, and endometriosis are specialties of our gynecologic care. Here at OB-GYN Associates, we work as a cohesive team that is completely devoted to our patients.
